

Enrichment Activities 3

(Units 6 and 7)

Sea Friends

Our world is covered with around 70 per cent water. Hence, there are a number of animals found in the water bodies like lakes, rivers, seas and oceans. There are many creatures in the sea and they are very interesting. There are many different kinds of species found underwater. Let us read about some interesting animals that live in the seas and oceans.

Seahorses: Do you know why seahorses are called so? A seahorse is a type of fish that lives very deep in the sea. There are many kinds of seahorses in the world. They are usually very colourful. They can be white, yellow, red, etc. and may have spotted or striped bodies. Their body structures have a mix of a horse, aardvark, fish, kangaroo and other animals. The head looks like that of a horse, the snout is like an aardvark's snout and the spines are like those of a puffer fish. They have a pouch like a kangaroo, eyes like a lizard and a tail like a monkey. They can also change colours like a chameleon.

Dolphins: Did you know dolphins are mammals like us? They take care of their young ones and are very social. They live in groups and work together to care for their babies and hunt for food. They are known to communicate very well with each other by producing a sound like that of a whistle.

Killer whale: The name itself can scare you. But do you know that they are the largest dolphins found in the world? They are found in all the oceans, from the Arctic and the Antarctic Oceans to the tropical seas. They eat fish and other marine mammals like sea lions and walruses. They can hunt down other whales as well!

Reading

Choose the right options to complete these sentences. Read the passage once again before you check your answers.

B. Think and answer these questions.  **CT**

- Why did so many children donate money to free Keiko?
- How do we know that Keiko loved children?
- Why should we not capture animals and force them to perform for us?  **compassion**

Speaking

Here are two pictures. They look nearly the same but there are a few differences.

Work in pairs. Give yourself a name. For example, one of you may be Mercury and the other, Venus. One of you should look at Picture A and the other at Picture B. Then each of you must talk about the pictures separately, and find out the differences in them.

Picture B

Picture A

Begin like this.

Mercury: In my picture, the girl's cap is violet in colour.

Venus: In my picture, it is...

Life Skills Activity

(critical thinking)

Complete the table with the names of six books you liked. Also say who wrote these books. Then, write two adjectives about each book. Find out more about these authors from the Internet. Also, see which other notable works have been authored by them.

Name of the book	Author	Adjectives about the book
