c. Spiders are actually helpful to people.
- Spiders are _____.
a. related to insects b. harmful c. insects
- How are spiders helpful to people?
a. They live all over the world. b. They eat pests.
c. They have many legs.
- Which question is not answered in the passage?
a. Where would I find a spider? b. How long do spiders live?
c. What do spiders eat?

Listening

A. Listen to this poem about a spider and a fly, and complete the sentences. Show your answers to your teacher and discuss the answers. 

"Will you walk into my parlour?" said the Spider to the _____,
"It's the prettiest little parlour that ever you did _____;
The way into my parlour is up a winding _____,
And I've a many curious things to show when you are _____."
"Oh no, no," said the little Fly, "to ask me is in _____,
For who goes up your winding stair can ne'er come down _____,"

B. Listen carefully to the description of the insects in these pictures. Identify them in the order in which they are being described. Check with your teacher for correct answers.  

Speaking

A. Sit in a circle. Read these questions. Think of your responses. Take turns to share your feelings with the class. 

1. What is your biggest fear?
2. What can you do to overcome your fear?
3. Who inspires you to overcome your fear—is it your parents, teachers or friends?

B. Work in pairs. Role play these situations to invite your partner.

Respond as indicated.   

1. Your cousin invites you for his/her birthday. You cannot go because you have an exam the following day.
2. You invite your friend for a game of table tennis in your club. He/She accepts the invitation.

Projects

A. With the help of your librarian, collect information on various creatures such as spiders, wasps, bees, termites, scorpions, hornets, red ants and mosquitoes found in India. You may refer to books, magazines and the Internet. Divide the class into three groups. Make three posters to educate the class about the various creatures.     

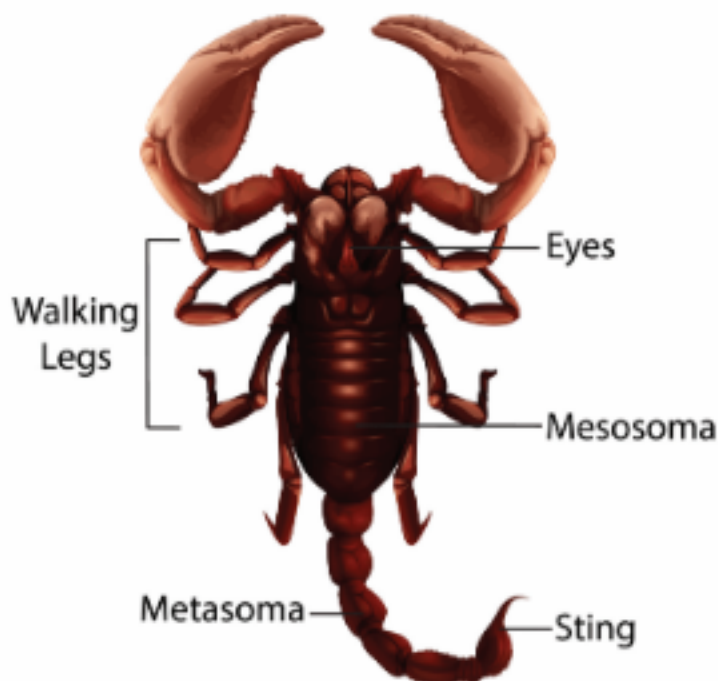

Group 1 will draw or stick pictures of the creatures. They will label the various body parts, especially the body parts they use to hurt others.

Group 2 will write about the preventive steps to protect oneself from getting hurt by such creatures.

Group 3 will suggest the available treatment. You may write about simple yet effective home remedies as well.

- B. Look at the image given below. It shows the body parts of a scorpion. Which body part do you think the scorpion uses to transfer its poison to another creature? Find out with the help of your teacher.

- C. Imagine that you have been asked to treat a scorpion bite. What symptoms should you notice in your patient? What treatment would you give to the person? The examples given below will help you. Work in pairs and fill up the rest of the table. You can take the help of the Internet.

Symptoms	Treatment
<i>itchiness and swelling</i>	<i>applying a cool compress</i>
